Newsletter April 2021

Hello ,
We have got pension news for you.

Check your pension

Why it's good to do this now

The pension planner has been updated with the new 2021 figures. The figures already include the lower accrual in 2021. This means you don't need to wait for your annual statement (UPS) to see the effect that lower pension accrual will have on your pension.

No increase to pensions in 2021

Unfortunately in 2021 pensions cannot be raised along with wages or price increases, known as indexation.

What does it mean for your pension?

As a consequence of not granting indexation the purchasing power of your pension will be decreasing. When assuming that the average price level is raised annually (inflation) by 2% and there is no indexation for ten years, then your pension will buy you 20% less after the same 10-year period. Though your benefit amount is not reduced, it will buy you less. Pensions at PDN have not been raised in recent years.

What do you think about our pension fund? Let us know!

PDN conducts a satisfaction survey every two years. The opinion of our members is important to us. Let us know what we're doing well and where we could improve. With this feedback we can improve our service. Will you help by completing the survey?

How can you take part?

PDN members will receive an email from our research agency, MWM2 around April 12, with a personal link to the survey.

It takes about six to eight minutes to complete the survey. You have until May 9, 2021 inclusive to complete the survey. The answers will be handled in strictest confidence and anonymously.

Information about the results

We will inform you about the results of the survey later this year.

Thank you very much in advance for completing the survey!
